Automated and Continuous API Security Testing :: Product Management :: DevSecOps / SRE

September 28, 2023, Dave managed Shahzeb directly

I had the opportunity to work with Shahzeb in 2023. He is persistent, creative, fast learning, and relentless. At our stage as a company, we needed Shahzeb to operate with a level of independence well beyond a typical intern.

Shahzeb was able to quickly orient and own his assigned project, delivering excellent results in the end. From seeking to understand the problem statement, to devising a focused solution, to conducting interviews to solicit feedback, Shahzeb drove his project to completion with little supervision and zero hand-holding.

Shahzeb's ability to operate this way would be impressive in any project situation, made even more notable in this case by the substantial degree of difficulty. This ambiguous customer challenge required deep research and a highly technical, AI-powered solution.

I respect Shahzeb's work ethic and ability to break down and think about complex problems, making him a great asset to any team.
