Rajaram (Raj) Ramanathan

"Shahzeb worked with me and my teams during the summer of 2023. Shahzeb is an outstanding computer scientist and a problem solver! He excels at identifying unusual opportunities and pursue them with rigor and diligence. He is adept at asking the right questions in any given context, and I was particularly amazed with his ability to appeal to and influence leaders in my organization and across the company. He is a curiosity-driven engineer with an out of the box thinking. He has a continuous focus on learning on a daily basis and takes ownership very seriously. He prioritizes skill enhancement, making him a better problem solver on a daily basis. Shahzeb solved some very important core problems in our engineering and AI space. Me and my team leaders highly appreciate his contributions to our product and engineering arsenal, and we look forward to working with him again if our paths cross."
